Sikadur®-31 GB Rapid

Sikadur®-31 GB Rapid

2-part thixotropic epoxy adhesive

Product Description

Sikadur®-31 GB Rapid is a solvent-free, moisture tolerant, thixotropic, structural two part adhesive and repair mortar, based on epoxy resins and special fillers, designed for use at temperatures between +5°C and +20°C.

Uses

As a structural adhesive for:

- Concrete elements
- Hard natural stone
- Ceramics, fibre Cement
- Mortar, Bricks, Blocks, Masonry etc.
- Steel, Iron, Aluminium
- Wood
- Polyester, Epoxy
- Glass

As a fast setting repair mortar for:

- Corners and edges
- Hole and void filling
- Joint arrises

Joint filling and crack sealing:

- Rigid joint filling
- Crack filling and sealing (non moving)
- For use with any of the Sikadur®-Combiflex systems.

Characteristics / Advantages

Sikadur®-31 GB Rapid has the following advantages:

- Easy to mix and apply
- Suitable for dry and damp concrete surfaces
- Very good adhesion to most construction materials
- High strength adhesive
- Thixotropic: non-sag and suitable for vertical and overhead application
- Solvent free
- Hardens without shrinkage
- Different coloured components (for mixing control)
- No primer needed
- High initial and ultimate strengths
- Good abrasion resistance
- Adhesive and filler in one
- Impermeable to liquids and water vapour
- Good chemical resistance
- Approved for potable water

Tests			
Approval / Standards	Conforms to ASTM C 881-78, Type I, Grade 3, Class B+C.		
	Conforms to EN 1504-4. Approved for potable water.		
Product Data			
Form			
Colours	Part A: white Part B: dark grey Part A+B mixed: concrete grey		
Packaging	6 kg (A+B) Pre batched unit, Pallets of 480 kg (80 x 6 kg). 1.2 kg (A+B) Pre batched unit, in boxes of 6 x 1.2 kg.		
Storage			
Storage Conditions / Shelf Life	24 months from date of production if stored properly in original unopened, sealed and undamaged packaging, in dry conditions at temperatures between +5°C and +30°C. Protect from direct sunshine.		
Technical Data			
Chemical Base	Epoxy resin.		
Density	1.65 kg/l (part A+B mixed) (at +20°C)		
Sag Flow	On vertical surfaces it is non-sag up to 10 mm thickness. (According to EN 1799)		
Layer Thickness	30 mm max.		
	When using multiple units, one after the other. Do not mix the following unit until the previous one has been used in order to avoid a reduction in handling time.		
Change of Volume	Shrinkage / Creep: Hardens without shrinkage.		
Thermal Expansion Coefficient	Coefficient W: 5.0 x 10 ⁻⁵ per °C (Temp. range: -20°C to +40°C). (According EN 1770)

	*100% concrete failure.					
E-Modulus	~ 4'300 N/mm ² (According to ISO 527					
System Information						
Application Details						
Substrate Quality	Mortar and concrete must be older than 28 days (depends on minimal requirement of strengths).					
	Verify the substrate strength (concrete, masonry, natural stone).					
	The substrate surface (all types) must be clean, dry and free from contaminants such as dirt, oil, grease, existing surface treatments and coatings etc.					
	Steel substrates must be de-rusted similar to Sa 2.5.					
	The substrate must be sound and all loose particles must be removed.					
Substrate Preparation	Concrete, mortar, stone, bricks: Substrates must be sound, dry, clean and free from laitance, ice, standing water, grease, oils, old surface treatments or coatings and all loose or friable particles must be removed to achieve a laitance and contaminant free, open textured surface.					
	Steel: Must be cleaned and prepared thoroughly to an acceptable quality i.e. by blastcleaning and vacuum. Avoid dew point conditions.					

3

Other surfaces (polyester, epoxy, glass, ceramic): On these substrates pre-apply Sikafloorr®-156 (primer) and then, "wet on wet" apply Sikadur®-31 GB Rapid.

Sikadur®-31 GB Rapid

Application Conditions / Limitations					
Substrate Temperature	+5°C min. / +20°C max.				
Ambient Temperature	+5°C min. / +20°C max.				
Material Temperature	Sikadur [®] -31 GB Rapid must be at a temperature of between +5°C and +30°C for application.				
Substrate Humidity	When applied to mat moisture concrete, brush the adhesive well into substrate.				
Dew Point	Beware of condensation!				
	Substrate temperature during application must be at least 3°C above dew point.				
Application Instructions					
Mixing	Part A : part B. = 3 : 1 by weight or volume				
Mixing Time	Mix spin (max cons mixir stir a entra	batched units: coarts A+B together for at least dle attached to a slow speed e c. 600 rpm) until the material b cistency and a uniform grey col ng. Then, pour the whole mix in cagain for approx. 1 more minut apment at a minimum. Mix only I within its potlife.	lectric drill ecomes smooth in lour. Avoid aeration while nto a clean container and e at low speed to keep air		
Application Method / Tools	When using a thin layer adhesive, apply the mixed adhesive to the prepared surface with a spatula, trowel, notched trowel, (or with hands protected by gloves). When applying as a repair mortar use some formwork.				
	When using for bonding metal profiles onto vertical surfaces, support and press uniformly using props for at least 12 hours, depending on the thickness applied (not more than 5 mm) and the room temperature.				
	Once hardened check the adhesion by tapping with a hammer.				
Cleaning of Tools	Clean all tools and application equipment with Sika® Thinner C immediately after use. Hardened / cured material can only be mechanically removed.				
Potlife	Potlife (200 g) (According to EN IS				
	+5°C	+10°C	+15°C		
	~ 60 minutes	~ 40 minutes	~ 20 minutes		
	The potlife begins when the resin and hardener are mixed. It is shorter at high temperatures and longer at low temperatures. The greater the quantity mixed, the shorter the potlife. To obtain longer workability at high temperatures, the mixed adhesive may be divided into portions. Another method is to chill parts A+B before mixing them (not below +5°C).

Value Base All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control. Local Restrictions Please note that as a result of specific local regulations the performance of this product may vary from country to country. Please consult the local Product Data Sheet for the exact description of the application fields.

Health and Safety Information

For information and advice on the safe handling, storage and disposal of chemical products, users shall refer to the most recent Material Safety Data Sheet containing physical, ecological, toxicological and other safety-related data.

Legal Notes

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
